- * *Powerful Herbal Supplements for Metabolism Boosting*
- * *Green Tea Catechins Enhance Lipid Metabolism / Stimulate Thermogenesis*

Individuals involved in weight loss programs often feel fatigued, irritable, and experience headaches.

WHY?

Your body becomes accustomed to your average daily caloric intake. When you begin decreasing caloric intake, additional stress is placed on your body as it attempts to adapt and become more efficient by increasing your metabolic rate. The result? Fatigue, irritability, and often times - headaches.

During this time it is more essential than ever to provide your body plentiful amounts of pure nutrients required for energy and vitality. Adequate hydration is also essential. Many energy drinks on the market contain high levels of caffeine and other known diuretics, which dehydrate your body. This places strain on your heart while additionally reducing your bodies ability to rid itself of toxins and other harmful chemicals.

bHIP Energy is a scientific breakthrough for those serious about obtaining their desired weight loss goal. bHIP's herbal clean blend of organic herbs, vitamins, minerals, and amino acids is scientifically formulated to infuse, hydrate, and instantly replenish energy at the cellular level with zero interference from artificial caffeine, stimulants, sugar, or by-products.

bHIP Energy promotes Thermogenesis and Boost Fat Metabolism through green tea catechins and guarana. Green tea catechins promote weight loss by favorably affecting lipid metabolism in the blood, and through the stimulation of thermogenesis. Guarana provides a time-released energy that increases and boosts fat metabolism.

Simply mix bHIP Energy Blend with 8 oz of water and enjoy a pure source of hydrating nutrients your body requires to reach your desired weight loss goal.

Don't allow the lack of essential nutrients and proper hydration to circumvent your weight loss results.

Enjoy bHIP's 'Time Released Energy' throughout your day and instantly start your path to a happier, healthier, more efficient - fuel burning machine!
